

# Development of the median fins of the North American paddlefish (*Polyodon spathula*), and a reevaluation of the lateral fin-fold hypothesis

William E. BEMIS & Lance GRANDE

## Abstract

To understand more about the structure of median fins of “lower actinopterygians” (that is, actinopterygians outside of Neopterygii), we investigated development of median fins in the North American paddlefish, *Polyodon spathula* (Acipenseriformes: Polyodontidae). We observed that dorsal and ventral median fin-folds form during the embryonic period, and are well-developed by hatching (stage 36). Fin-webs of both the dorsal median fin-fold and ventral median fin-fold greatly narrow at the posterior tip of the body, so that the notochordal axis reaches the most caudal point of the body. The three median fins (dorsal, anal and caudal) differentiate rapidly from the median fin-folds during the yolk-sac larval period (stages 36 to 46). The order of differentiation is dorsal, anal and caudal, which reflects the general gradient of development from anterior to posterior. Myotomes extend first into middle portions of dorsal and anal fins. Cartilage condensations that will form radial elements and bundles of actinotrichia that will contribute to fin-rays also develop first in the middle portions of these fins. Radial skeletal elements of dorsal and anal fins differentiate in this order: middle radials, proximal radials, and finally distal radials. Juveniles have only slightly fewer radials in the dorsal and anal fins than do adults. Thus, fin endoskeletons are essentially fixed by metamorphosis, that is, about 39 days old, when fin shapes approximate those of adults, and adult coloration and feeding mode are achieved.

Pectoral and pelvic fins of *Polyodon* share a skeletal design (based on radial elements) with dorsal and anal fins. In contrast, the endoskeleton and exoskeleton of the caudal fin differ from those of the dorsal, anal and paired fins. Unlike other fins, myotomal extensions do not contribute to either the epichordal or hypochordal lobes of the caudal fin. Dorsally, the epichordal lobe develops from a portion of the dorsal median fin-fold, and its endoskeleton consists of a series of supraneural elements and neural arches; in contrast, such elements do not participate in formation or support of the dorsal fin. Fulcra form along the leading edge of both the epichordal and hypochordal lobes of the caudal fin; in contrast, fulcra are absent from dorsal, anal and paired fins. Ventrally, the hypochordal lobe forms from a portion of the ventral median fin-fold, and its endoskeleton consists chiefly of a series of hypural bones that is serially homologous with hemal arches and spines; in contrast, such elements do not participate in formation or support of the anal fin. The caudal fin also has a few so-called distal caudal radials of uncertain homology.

A small preanal portion of the ventral median fin-fold persists between the anus and yolk-sac throughout the yolk-sac larval period. Neither myotomes nor cartilage condensations contribute to this preanal fin, and it is lost during further development. Pelvic fin-buds develop later (stage 38) than do median fins (<stage 36). Median fin-folds are never continuous with the pelvic fin buds. A wide stretch of flank separates the pelvic and pectoral fin-buds, with no trace of a continuous fin-fold between them.

For more than a century, the structure and development of fins of Acipenseriformes have been studied by authors primarily interested in evolution of gnathostome fins. Fins of Acipenseriformes and other gnathostomes have been interpreted through many hypothetical (that is, non-empirical) models, which now are entrenched in the literature. We reevaluate some of the conclusions and extrapolations of these models, and concepts related to the lateral fin-fold hypothesis. We find little developmental or phylogenetic support for most of these ideas, and urge a retreat from such idealistic morphology.

## The whole contribution can be purchased as a PDF file.

To avoid unlicensed distribution of the PDF files we use an encryption method which which attaches the permission to open the PDF files to the customers computer.

The installation of these PDF files does exclusively run on IBM compatibles (**not** Apple Macintosh).

### Prices

Articles in journals and single contributions or chapters in books:

**10 € basic price** (the first 10 pages are included), and

**0.50 € page price**, beginning with the 11th page.

### Orders

Use our order form for PDF files or send your order informal per e-mail (pdf@pfeil-verlag.de). The only accepted payment is by credit card. Using the order form for PDF files, your data will be transmitted by secure link (ssl). You also may send the informations informally by e-mail, fax, phone or mail.

### Handling

- After we charged your credit card, you will receive the **PDF file(s)** together with an **installer** ("install.exe") per e-mail. Larger PDF files can be downloaded from our webspace, if necessary, or we send it by mail on CD.
- To open the encrypted PDF files, the plugin "fOpen32.api" must be existing in the "Plug\_ins" directory of Acrobat Reader or Acrobat. Running the installer, you will be informed if this plugin is missing.
- Running "install.exe" on your computer, a new directory "PDF-Pfeil" will be created.
- During installation, a "Product ID" [e.g., 1234509876] and an "Input string" [e.g., ABCXYZMNO] are shown.
- Clicking on the "Create E-Mail" button, your e-mail program will open, and both the "Product ID" and the "Input string" will automatically be transferred to a new e-mail.
- Submit this e-mail and stop installation.
- As soon as possible, depending on our business hours, you will receive an e-mail with an "authorization string" [e.g., XOOFQOXSV].
- Run the installer again and transfer this string to the corresponding box. The PDF file can now be opened.

### Libraries and standing orders

If you wish to subscribe a PDF version of a journal or you want to order publications for a public library, please contact us per e-mail.

## Dieser Beitrag kann als PDF-Datei erworben werden.

Um die unlizenzierte Weitergabe der PDF-Dateien zu verhindern, verwenden wir eine spezielle Verschlüsselungstechnik, die die Berechtigung zum Öffnen der PDF-Dateien an einen Rechner bindet.

Die Installation dieser PDF-Dateien läuft nur auf IBM-kompatiblen Computern (**nicht** Apple Macintosh).

### Preise

Zeitschriftenbeiträge und einzelne Kapitel aus Sammelbänden bzw. Büchern:

**10 € Grundbetrag** (einschließlich der ersten 10 Seiten), und

**0,50 € Seitenpreis** ab der 11. Seite.

### Bestellungen

Bestellungen sind mit dem PDF-Bestellformular oder formlos per E-Mail (pdf@pfeil-verlag.de) an uns zu richten. Die Bezahlung ist ausschließlich per Kreditkarte möglich. Bei Verwendung unseres Bestellformulars werden die Kreditkartendaten über eine gesicherte Verbindung (ssl) übermittelt. Sie können die Daten aber auch formlos per E-Mail, Fax, Post oder telefonisch übermitteln.

### Abwicklung

- Nach Abbuchung des Betrages von Ihrer Kreditkarte schicken wir Ihnen die **PDF-Datei(en)** zusammen mit einem **Installer** (»install.exe«) per E-Mail. Größere Dateien bieten wir Ihnen gegebenenfalls zum Download von unserem Webspace an, bzw. schicken sie auf CD per Post.
- Um die verschlüsselten PDF-Dateien öffnen zu können, muss sich das Plugin »fOpen32.api« im »Plug\_ins«-Verzeichnis von Acrobat Reader bzw. Acrobat befinden. Bei der Ausführung des Installers werden Sie gegebenenfalls darauf hingewiesen.
- Führen Sie den Installer auf Ihrem Computer aus, so wird ein Verzeichnis »PDF-Pfeil« angelegt.
- Im Verlauf der Installation werden eine »Product ID« [z.B. 1234509876] und ein »Input string« [z.B. ABCXYZMNO] angezeigt.
- Klicken Sie im angezeigten Fenster auf »Create E-Mail«, so öffnet sich Ihr E-Mail-Programm und die »Product ID« und der »Input string« werden automatisch in eine neue E-Mail übertragen.
- Schicken Sie die E-Mail ab und brechen Sie die Installation ab.
- So bald wie möglich, aber abhängig von unseren Bürozeiten, senden wir Ihnen einen »Authorization string« [z.B. XOOFQOXSV] zurück.
- Geben Sie diesen String bei erneuter Installation ein. Anschließend kann die PDF-Datei geöffnet werden.

### Bibliotheken und Zeitschriftenabonnements

Wenn Sie die PDF-Version einer Zeitschrift abonnieren oder für eine Bibliothek bestellen wollen, setzen Sie sich bitte per E-Mail mit uns in Verbindung.
