

†*Aethocephalichthys hyainarhinus* gen. et sp. nov., a new and enigmatic Late Cretaceous actinopterygian from North America and New Zealand

Christopher FIELITZ, J. D. STEWART & Joan WIFFEN

Abstract

A new actinopterygian, *Aethocephalichthys hyainarhinus* gen. et sp. nov., is described. It is Late Cretaceous in age and found in the Niobrara, Eutaw, and Pierre Shale formations of North America, and in the Maungataniwha Sandstone Formation of New Zealand. Almost all specimens consist solely of the neurocranium. It is rectangular in shape with a blunt snout and characterized by the fusion of all the bones of the neurocranium. The bones of the roof and snout are covered with a dermal pattern of polygons, many of which have a central pore. Each pectoral fin-ray has a shallow channel with pits along the channel. This species shares a number of primitive characters with various actinopterygian groups such as an ossified interorbital septum. Potential characters that could place *Aethocephalichthys* within the teleosts are inconclusive due to the bone fusion. These include a deep posterior myodome and an unpaired vomer. We conclude that this fish is an incertae sedis actinopterygian.

Introduction

The worldwide record of Late Cretaceous marine fishes is well documented (WOODWARD 1901, ARAMBOURG 1954, RUSSELL 1988). Identification of that fossil material is often a different matter. As listed by RUSSELL (1988), there are a number of North American localities that yield fossil-fish remains, but these are very poorly preserved fossils and cannot be identified beyond high taxonomic levels. There are also those specimens that defy identification despite being moderately well preserved. These lack the characters that allow them to be assigned to a particular taxonomic group. *Aethocephalichthys hyainarhinus* is an example of a species that is both poorly preserved and lacks characters to allow it to be assigned to a taxonomic group. It has been found at several Late Cretaceous localities in North America and in New Zealand. To date, specimens of *A. hyainarhinus* consist mostly of neurocrania. Numerous collectors have encountered this species in the Pierre Shale (L. D. MARTIN pers. comm.), but despite the large number of specimens collected, it has remained undescribed until now.

Localities and biostratigraphy

New Zealand: Neurocranial specimens are found at the Mangahouanga Stream fossil site which is a tributary of the Te Hoe River, west of Hawke's Bay (Fig. 1A). The Maungataniwha Sandstone Formation is Upper Piripauan to Lower Haumurian in age. This is equivalent to Santonian to Maastrichtian ages of North America and Europe. The boundary between uppermost Piripauan and lowermost Haumurian is not clear. The formation represents a near-shore, shallow-water environment such as a bay. A nearby delta is suggested by the preservation of terrestrial plants and animals (CRAMPTON & MOORE 1990).

Initially, the neurocranial specimens were found in the rocks of the conglomeratic facies of the Maungataniwha Sandstone. The neurocrania are incomplete fragments, and most are found in calcareous and phosphatic concretions. Other fossils found in this formation consist of a mixture of marine and terrestrial organisms. Marine organisms include bivalves, such as *Inoceramus*, and other mollusks, such as ammo-

The whole contribution can be purchased as a PDF file.

To avoid unlicensed distribution of the PDF files we use an encryption method which which attaches the permission to open the PDF files to the customers computer.

The installation of these PDF files does exclusively run on IBM compatibles (**not** Apple Macintosh).

Prices

Articles in journals and single contributions or chapters in books:

10 € basic price (the first 10 pages are included), and

0.50 € page price, beginning with the 11th page.

Orders

Use our order form for PDF files or send your order informal per e-mail (pdf@pfeil-verlag.de). The only accepted payment is by credit card. Using the order form for PDF files, your data will be transmitted by secure link (ssl). You also may send the informations informally by e-mail, fax, phone or mail.

Handling

- After we charged your credit card, you will receive the **PDF file(s)** together with an **installer** ("install.exe") per e-mail. Larger PDF files can be downloaded from our webspace, if necessary, or we send it by mail on CD.
- To open the encrypted PDF files, the plugin "fOpen32.api" must be existing in the "Plug_ins" directory of Acrobat Reader or Acrobat. Running the installer, you will be informed if this plugin is missing.
- Running "install.exe" on your computer, a new directory "PDF-Pfeil" will be created.
- During installation, a "Product ID" [e.g., 1234509876] and an "Input string" [e.g., ABCXYZMNO] are shown.
- Clicking on the "Create E-Mail" button, your e-mail program will open, and both the "Product ID" and the "Input string" will automatically be transferred to a new e-mail.
- Submit this e-mail and stop installation.
- As soon as possible, depending on our business hours, you will receive an e-mail with an "authorization string" [e.g., XOOFQOXSV].
- Run the installer again and transfer this string to the corresponding box. The PDF file can now be opened.

Libraries and standing orders

If you wish to subscribe a PDF version of a journal or you want to order publications for a public library, please contact us per e-mail.

Dieser Beitrag kann als PDF-Datei erworben werden.

Um die unlizenzierte Weitergabe der PDF-Dateien zu verhindern, verwenden wir eine spezielle Verschlüsselungstechnik, die die Berechtigung zum Öffnen der PDF-Dateien an einen Rechner bindet.

Die Installation dieser PDF-Dateien läuft nur auf IBM-kompatiblen Computern (**nicht** Apple Macintosh).

Preise

Zeitschriftenbeiträge und einzelne Kapitel aus Sammelbänden bzw. Büchern:

10 € Grundbetrag (einschließlich der ersten 10 Seiten), und

0,50 € Seitenpreis ab der 11. Seite.

Bestellungen

Bestellungen sind mit dem PDF-Bestellformular oder formlos per E-Mail (pdf@pfeil-verlag.de) an uns zu richten. Die Bezahlung ist ausschließlich per Kreditkarte möglich. Bei Verwendung unseres Bestellformulars werden die Kreditkartendaten über eine gesicherte Verbindung (ssl) übermittelt. Sie können die Daten aber auch formlos per E-Mail, Fax, Post oder telefonisch übermitteln.

Abwicklung

- Nach Abbuchung des Betrages von Ihrer Kreditkarte schicken wir Ihnen die **PDF-Datei(en)** zusammen mit einem **Installer** (»install.exe«) per E-Mail. Größere Dateien bieten wir Ihnen gegebenenfalls zum Download von unserem Webspace an, bzw. schicken sie auf CD per Post.
- Um die verschlüsselten PDF-Dateien öffnen zu können, muss sich das Plugin »fOpen32.api« im »Plug_ins«-Verzeichnis von Acrobat Reader bzw. Acrobat befinden. Bei der Ausführung des Installers werden Sie gegebenenfalls darauf hingewiesen.
- Führen Sie den Installer auf Ihrem Computer aus, so wird ein Verzeichnis »PDF-Pfeil« angelegt.
- Im Verlauf der Installation werden eine »Product ID« [z.B. 1234509876] und ein »Input string« [z.B. ABCXYZMNO] angezeigt.
- Klicken Sie im angezeigten Fenster auf »Create E-Mail«, so öffnet sich Ihr E-Mail-Programm und die »Product ID« und der »Input string« werden automatisch in eine neue E-Mail übertragen.
- Schicken Sie die E-Mail ab und brechen Sie die Installation ab.
- So bald wie möglich, aber abhängig von unseren Bürozeiten, senden wir Ihnen einen »Authorization string« [z.B. XOOFQOXSV] zurück.
- Geben Sie diesen String bei erneuter Installation ein. Anschließend kann die PDF-Datei geöffnet werden.

Bibliotheken und Zeitschriftenabonnements

Wenn Sie die PDF-Version einer Zeitschrift abonnieren oder für eine Bibliothek bestellen wollen, setzen Sie sich bitte per E-Mail mit uns in Verbindung.
