

The caudal skeleton of the Triassic actinopterygian †*Prohalecites* and its phylogenetic position

Gloria ARRATIA & Andrea TINTORI

Abstract

The caudal fin of †*Prohalecites* is hemiheterocercal, both with an epaxial and a hypaxial basal fulcra, and fringing fulcra, and with fewer than 19 principal caudal fin-rays. The caudal skeleton has irregularly shaped and expanded preural and ural neural arches that usually keep their neural spines. Individuals with complete neural arches (including their spines) do not have epurals. In contrast, individuals with incomplete preural and ural arches bear three to five epurals. Similar preural and ural neural arches are present in †caturids and in †semionotiforms, e.g. †*Dapedium* and †*Tetragonolepis*. The expanded and elongated ural neural arches produce a bony block increasing the stiffness of the tail during locomotion (a function similar to that of the calcified ural neural cartilages in †caturids and of the uroneurals in teleosts). According to the morphology of these elements and to the phylogenetic hypothesis, the last expanded preural and ural neural arches of †*Prohalecites* and †semionotiforms and the modified preural and ural neural arches (or uroneural-like elements) of †pachycormiforms are not uroneurals (paired elongated ural neural arches) like those of Teleostei. However, all of them result from modifications of the last caudal neural arches.

†*Prohalecites* possesses an interesting mosaic of primitive and advanced characters, some of which have been previously interpreted as synapomorphies of Teleostei, e.g., presence of a posteriorly expanded frontal bone of distinct shape, a mobile premaxilla, a propterygium fused to the first pectoral ray, and fewer than seven epurals. It shares with the †Macrosemiidae the presence of a ventral preopercular bone, which has been previously interpreted as a unique character of the family. Among the generalized characters, †*Prohalecites* has two vomerine tooth plates, a suprangular bone, one hypohyal, a polyural caudal skeleton, and fringing fulcra on all fins. Autapomorphies of †*Prohalecites* are the presence of large nasal bones sutured to each other and the loss of body scales. †*Prohalecites* shows different phylogenetic positions among non-teleostean fishes when the outgroups are changed, but it is still more advanced than Amiidae and more primitive than †aspidorhynchiforms, †pachycormiforms, and †pyncnodontiforms.

Introduction

†*Prohalecites*, a small, naked neopterygian (Fig. 1A, B) of about 50 mm maximum length, is known from the type locality of Perledo, and by numerous, well preserved specimens from Ca' del Frate (Viggiù, northern Italy). The Ca' del Frate site opens in the middle Kalkschieferzone as new data suggest. The only datation for this level is based on palynomorphs studied by SCHEURING (1978). Though palynomorph scale is not well correlated to the classic ammonoid one, a latest Ladinian/Middle Triassic age can be inferred.

Most of the original material used by BELLOTTI (1857), DEECKE (1889), and ALESSANDRI (1910) in their pioneering studies of †*Prohalecites* was lost or destroyed during the Second World War. New material has not been collected in Calcare di Perledo for more than half a century. All of this new material has been collected by TINTORI and by collaborators in Ca' del Frate. Part of the new material was used by TINTORI (1990) in the most comprehensive description of †*Prohalecites porroi*. This plus other collections during the last years is considered in this contribution.

TINTORI (1990) concluded that †*Prohalecites* is an intermediate taxon between †Parasemionotidae and †*Dapedium* plus †Pholidophoridae (being closer to the last two). †*Prohalecites* is similar to some †Parasemionotidae in the dermal skull, to †Macrosemiidae in the presence of a ventral preopercular bone that

The whole contribution can be purchased as a PDF file.

To avoid unlicensed distribution of the PDF files we use an encryption method which which attaches the permission to open the PDF files to the customers computer.

The installation of these PDF files does exclusively run on IBM compatibles (**not** Apple Macintosh).

Prices

Articles in journals and single contributions or chapters in books:

10 € basic price (the first 10 pages are included), and

0.50 € page price, beginning with the 11th page.

Orders

Use our order form for PDF files or send your order informal per e-mail (pdf@pfeil-verlag.de). The only accepted payment is by credit card. Using the order form for PDF files, your data will be transmitted by secure link (ssl). You also may send the informations informally by e-mail, fax, phone or mail.

Handling

- After we charged your credit card, you will receive the **PDF file(s)** together with an **installer** ("install.exe") per e-mail. Larger PDF files can be downloaded from our webspace, if necessary, or we send it by mail on CD.
- To open the encrypted PDF files, the plugin "fOpen32.api" must be existing in the "Plug_ins" directory of Acrobat Reader or Acrobat. Running the installer, you will be informed if this plugin is missing.
- Running "install.exe" on your computer, a new directory "PDF-Pfeil" will be created.
- During installation, a "Product ID" [e.g., 1234509876] and an "Input string" [e.g., ABCXYZMNO] are shown.
- Clicking on the "Create E-Mail" button, your e-mail program will open, and both the "Product ID" and the "Input string" will automatically be transferred to a new e-mail.
- Submit this e-mail and stop installation.
- As soon as possible, depending on our business hours, you will receive an e-mail with an "authorization string" [e.g., XOOFQOXSV].
- Run the installer again and transfer this string to the corresponding box. The PDF file can now be opened.

Libraries and standing orders

If you wish to subscribe a PDF version of a journal or you want to order publications for a public library, please contact us per e-mail.

Dieser Beitrag kann als PDF-Datei erworben werden.

Um die unzensurierte Weitergabe der PDF-Dateien zu verhindern, verwenden wir eine spezielle Verschlüsselungstechnik, die die Berechtigung zum Öffnen der PDF-Dateien an einen Rechner bindet.

Die Installation dieser PDF-Dateien läuft nur auf IBM-kompatiblen Computern (**nicht** Apple Macintosh).

Preise

Zeitschriftenbeiträge und einzelne Kapitel aus Sammelbänden bzw. Büchern:

10 € Grundbetrag (einschließlich der ersten 10 Seiten), und

0,50 € Seitenpreis ab der 11. Seite.

Bestellungen

Bestellungen sind mit dem PDF-Bestellformular oder formlos per E-Mail (pdf@pfeil-verlag.de) an uns zu richten. Die Bezahlung ist ausschließlich per Kreditkarte möglich. Bei Verwendung unseres Bestellformulars werden die Kreditkartendaten über eine gesicherte Verbindung (ssl) übermittelt. Sie können die Daten aber auch formlos per E-Mail, Fax, Post oder telefonisch übermitteln.

Abwicklung

- Nach Abbuchung des Betrages von Ihrer Kreditkarte schicken wir Ihnen die **PDF-Datei(en)** zusammen mit einem **Installer** (»install.exe«) per E-Mail. Größere Dateien bieten wir Ihnen gegebenenfalls zum Download von unserem Webspace an, bzw. schicken sie auf CD per Post.
- Um die verschlüsselten PDF-Dateien öffnen zu können, muss sich das Plugin »fOpen32.api« im »Plug_ins«-Verzeichnis von Acrobat Reader bzw. Acrobat befinden. Bei der Ausführung des Installers werden Sie gegebenenfalls darauf hingewiesen.
- Führen Sie den Installer auf Ihrem Computer aus, so wird ein Verzeichnis »PDF-Pfeil« angelegt.
- Im Verlauf der Installation werden eine »Product ID« [z.B. 1234509876] und ein »Input string« [z.B. ABCXYZMNO] angezeigt.
- Klicken Sie im angezeigten Fenster auf »Create E-Mail«, so öffnet sich Ihr E-Mail-Programm und die »Product ID« und der »Input string« werden automatisch in eine neue E-Mail übertragen.
- Schicken Sie die E-Mail ab und brechen Sie die Installation ab.
- So bald wie möglich, aber abhängig von unseren Bürozeiten, senden wir Ihnen einen »Authorization string« [z.B. XOOFQOXSV] zurück.
- Geben Sie diesen String bei erneuter Installation ein. Anschließend kann die PDF-Datei geöffnet werden.

Bibliotheken und Zeitschriftenabonnements

Wenn Sie die PDF-Version einer Zeitschrift abonnieren oder für eine Bibliothek bestellen wollen, setzen Sie sich bitte per E-Mail mit uns in Verbindung.
