

# A new genus of Saurodontidae (Teleostei: †Ichthyodectiformes) from Upper Cretaceous rocks of the Western Interior of North America

J. D. STEWART

## Abstract

To date, only two genera of saurodontid teleosts have been recognized: *Saurocephalus* HARLAN 1824 and *Saurodon* HAYS 1830. LOOMIS (1900) named a new species of *Saurodon* (*Saurodon pygmaeus*), based upon a mandible from the Niobrara Chalk Formation of Kansas, U.S.A. Specimens of this species have been published incorrectly as *Ichthyodectes ctenodon* and *Saurodon leanus*. The species is valid and cannot be assigned to either of those genera. It exhibits several synapomorphies of the Saurodontidae, but does not share some synapomorphies that unite *Saurodon* and *Saurocephalus*; it is a sister-group to those two genera. I therefore propose the generic name *Prosaurodon*, whose type species is *Prosaurodon pygmaeus* (LOOMIS 1900). *Prosaurodon* is known from Santonian and Campanian horizons in North America, but the divergence time for that lineage must be no younger than the Cenomanian, because there are Cenomanian specimens of *Saurodon* from Texas.

The new genus exhibits, in addition to the predentary, three character states that have at times been considered synapomorphies of the Ichthyodectidae: unpaired (fused) parietals; parietal participating in the supra-occipital crest, and basal sclerotics with a serrated margin. Furthermore, the only complete saurodontid skeleton known to date shows a short, remote anal fin which also has been suggested as a synapomorphy of the Ichthyodectidae. New evidence supports the separation of the Saurodontidae plus Ichthyodectidae from the Cladocyclidae. However, the Ichthyodectidae may be paraphyletic with respect to the Saurodontidae.

Saurodontids retained a narrow gular. The presence or absence of this element should be determined for other ichthyodectoid genera.

## Introduction

Saurodontids are a specialized group of rather primitive teleosts. The most bizarre specialization of the family is a mandible that juts out beyond the upper jaw and is tipped with an edentulous triangular median element, the predentary. To date, there are only two recognized genera, *Saurodon* HAYS 1830 and *Saurocephalus* HARLAN 1824. Although both were described early in the 19th century, the first record of a saurodontid predentary was published by Alban STEWART (1898). This was the beginning of the recognition that these two genera formed a group distinct from other ichthyodectiforms.

The Bayerische Staatssammlung für Paläontologie und Historische Geologie, München, apparently purchased a collection of fossils from the Niobrara Formation of Kansas from C. H. STERNBERG about 1893. Many of the actinopterygians in this collection were described by F. B. LOOMIS (1900). Among the new taxa he described was *Saurodon pygmaeus* based on a single mandible. One of the most distinctive features of this species was the absence of notches below the teeth on the labial side. All other species of this genus were thought to have a notch at the base of each tooth. The small size was also distinctive. The type description contained no direct mention of the facet on the anterior end of the dentary for the predentary, but assignment to this genus implied that one was present. Unlike many of the larger Cretaceous fossils from the collection, this tiny specimen largely survived the ravages of the second World War. Judging from the illustration in the type description, only the coronoid area has been lost (Figs. 1, 2). The

## The whole contribution can be purchased as a PDF file.

To avoid unlicensed distribution of the PDF files we use an encryption method which which attaches the permission to open the PDF files to the customers computer.

The installation of these PDF files does exclusively run on IBM compatibles (**not** Apple Macintosh).

### Prices

Articles in journals and single contributions or chapters in books:

**10 € basic price** (the first 10 pages are included), and

**0.50 € page price**, beginning with the 11th page.

### Orders

Use our order form for PDF files or send your order informal per e-mail (pdf@pfeil-verlag.de). The only accepted payment is by credit card. Using the order form for PDF files, your data will be transmitted by secure link (ssl). You also may send the informations informally by e-mail, fax, phone or mail.

### Handling

- After we charged your credit card, you will receive the **PDF file(s)** together with an **installer** ("install.exe") per e-mail. Larger PDF files can be downloaded from our webspace, if necessary, or we send it by mail on CD.
- To open the encrypted PDF files, the plugin "fOpen32.api" must be existing in the "Plug\_ins" directory of Acrobat Reader or Acrobat. Running the installer, you will be informed if this plugin is missing.
- Running "install.exe" on your computer, a new directory "PDF-Pfeil" will be created.
- During installation, a "Product ID" [e.g., 1234509876] and an "Input string" [e.g., ABCXYZMNO] are shown.
- Clicking on the "Create E-Mail" button, your e-mail program will open, and both the "Product ID" and the "Input string" will automatically be transferred to a new e-mail.
- Submit this e-mail and stop installation.
- As soon as possible, depending on our business hours, you will receive an e-mail with an "authorization string" [e.g., XOOFQOXSV].
- Run the installer again and transfer this string to the corresponding box. The PDF file can now be opened.

### Libraries and standing orders

If you wish to subscribe a PDF version of a journal or you want to order publications for a public library, please contact us per e-mail.

## Dieser Beitrag kann als PDF-Datei erworben werden.

Um die unlizenzierte Weitergabe der PDF-Dateien zu verhindern, verwenden wir eine spezielle Verschlüsselungstechnik, die die Berechtigung zum Öffnen der PDF-Dateien an einen Rechner bindet.

Die Installation dieser PDF-Dateien läuft nur auf IBM-kompatiblen Computern (**nicht** Apple Macintosh).

### Preise

Zeitschriftenbeiträge und einzelne Kapitel aus Sammelbänden bzw. Büchern:

**10 € Grundbetrag** (einschließlich der ersten 10 Seiten), und

**0,50 € Seitenpreis** ab der 11. Seite.

### Bestellungen

Bestellungen sind mit dem PDF-Bestellformular oder formlos per E-Mail (pdf@pfeil-verlag.de) an uns zu richten. Die Bezahlung ist ausschließlich per Kreditkarte möglich. Bei Verwendung unseres Bestellformulars werden die Kreditkartendaten über eine gesicherte Verbindung (ssl) übermittelt. Sie können die Daten aber auch formlos per E-Mail, Fax, Post oder telefonisch übermitteln.

### Abwicklung

- Nach Abbuchung des Betrages von Ihrer Kreditkarte schicken wir Ihnen die **PDF-Datei(en)** zusammen mit einem **Installer** (»install.exe«) per E-Mail. Größere Dateien bieten wir Ihnen gegebenenfalls zum Download von unserem Webspace an, bzw. schicken sie auf CD per Post.
- Um die verschlüsselten PDF-Dateien öffnen zu können, muss sich das Plugin »fOpen32.api« im »Plug\_ins«-Verzeichnis von Acrobat Reader bzw. Acrobat befinden. Bei der Ausführung des Installers werden Sie gegebenenfalls darauf hingewiesen.
- Führen Sie den Installer auf Ihrem Computer aus, so wird ein Verzeichnis »PDF-Pfeil« angelegt.
- Im Verlauf der Installation werden eine »Product ID« [z.B. 1234509876] und ein »Input string« [z.B. ABCXYZMNO] angezeigt.
- Klicken Sie im angezeigten Fenster auf »Create E-Mail«, so öffnet sich Ihr E-Mail-Programm und die »Product ID« und der »Input string« werden automatisch in eine neue E-Mail übertragen.
- Schicken Sie die E-Mail ab und brechen Sie die Installation ab.
- So bald wie möglich, aber abhängig von unseren Bürozeiten, senden wir Ihnen einen »Authorization string« [z.B. XOOFQOXSV] zurück.
- Geben Sie diesen String bei erneuter Installation ein. Anschließend kann die PDF-Datei geöffnet werden.

### Bibliotheken und Zeitschriftenabonnements

Wenn Sie die PDF-Version einer Zeitschrift abonnieren oder für eine Bibliothek bestellen wollen, setzen Sie sich bitte per E-Mail mit uns in Verbindung.
